

## **New standards for Data Security and Server Management: O&O DiskImage Server 20 released**

Berlin, December 10, 2024

**O&O Software GmbH announces the release of O&O DiskImage Server 20, the latest version of the proven backup and recovery software, which is specifically tailored to the requirements of modern server environments. With a multitude of new functions and optimizations, O&O DiskImage Server 20 takes data backup and recovery to a new level and supports the new Windows Server 2025.**

### **Support for Windows Server 2025**

O&O DiskImage Server Edition is compatible with Windows Server 2025, 2022, 2019 and 2016 in all editions as well as Microsoft Windows 11 and Windows 10. Existing backups from earlier versions can of course still be used. Using the included start environment, backups can also be restored directly to empty systems regardless of the hardware, so that older Windows versions are also supported.

### **New functions and optimized technology for modern IT infrastructures**

O&O DiskImage Server 20 was developed specifically for the needs of companies that rely on a flexible, scalable and secure solution for their data backup. The new version impresses with:

#### **Automated backups and intelligent planning**

Regular data backups can be easily automated to ensure the protection of all important server data - without affecting server performance.

#### **Simplicity meets professionalism**

O&O DiskImage is aimed at companies and private individuals alike. It is so easy to use that even lay people can create a complete backup in just a few minutes. At the same time, it meets the requirements of IT professionals who want to implement comprehensive backup strategies.

#### **Comprehensive recovery options**

With the new boot medium and the extended hardware independence ("Machine Independent Restore"), recovery is easy and efficient even on new or changed hardware.

#### **Extended VHD/VHDX functionality**

Working with virtual machines becomes safer and more efficient with O&O DiskImage 20. You can convert backup files into virtual backups of the type Microsoft Virtual Hard Disk (VHDX and VHD) and create incremental and differential backups of virtual drives.

#### **Efficient incremental and differential Backups**

Thanks to improved algorithms, storage space and time can be saved considerably when backing up data.

#### **Optimal support for virtual machines**

The software enables seamless backup and recovery of virtual environments and is therefore perfectly tailored to hybrid and cloud-based IT structures.

### **Security with AES-256 Encryption**

Sensitive data is optimally protected by the latest encryption technologies.

### **User-friendly Server optimization**

The newly designed, intuitive user interface offers IT administrators quick and easy access to manage complex backup strategies.

### **Ideal for Companies of all sizes**

O&O DiskImage Server 20 offers companies a reliable solution to prevent data loss. Whether complete system images, individual partitions or specific files - the software ensures maximum flexibility when backing up and restoring data.

### **Pricing and Availability**

O&O DiskImage Server 20 is now available on the official website of O&O Software GmbH and from authorized resellers. O&O DiskImage Server 20 costs net 299 USD.

Companies benefit from flexible licensing models that are tailored to their individual requirements. Information on volume licenses can be requested here:: <https://www.oo-software.com/en/get-a-quote>.

Interested users can find a free 30-day trial version of O&O DiskImage 20 Server Edition on the O&O website: <https://www.oo-software.com/en/oodiskimage-corporate/get-trial-version>.

## **About O&O Software**

O&O develops solutions for corporate customers that not only support them in their daily activities, but also help substantially reduce their costs. Our products for system optimization, data imaging, data recovery, secure data deletion and company-wide administration are pioneers in the Windows technology sector. Together with our worldwide network of partners, we support corporations, companies, public authorities and private customers in over 190 countries, all from our headquarters in Berlin, Germany.
