

O&O FileBackup: Data backup made easy

Berlin, December 10, 2019

O&O FileBackup detects new and changed files. There's no longer any need to search manually for photos, videos, and other documents in order to back them up. This can all be done automatically. O&O FileBackup can be used immediately. On every Windows PC. Without installation and without equipment. Start, select, save. Finished.

Automatic recognition of important files

O&O FileBackup automatically detects important files and suggests them for backup. After photos, videos, music, and office documents are selected, all files and their corresponding file extensions will be found and backed up. The selection can be customized to include more files in the backup. Folders and entire partitions can be selected without any problem. And to make sure only the really important files are backed up, system and program files are automatically excluded. This saves time and storage space!

Automatic backup of new and changed files

To avoid searching for new or changed files, O&O FileBackup automatically detects such files for you and proposes them for backup. This is especially helpful when importing photos and videos as it immediately creates another copy of this valuable data.

Restoring files

Restoring files is as easy as backing them up: just use the built-in restore feature in O&O FileBackup to select the files you want to restore and then restore them to a target folder.

O&O FileBackup supports Windows 10, 8, and 7

O&O FileBackup requires no installation because the program can be started directly. We recommend using an external storage medium for backing up data such as a USB stick or hard disk. Along with Windows 10, O&O FileBackup also supports the older Windows versions 8 and 7 as well as Windows Server 2013, 2016 and 2019.

- Assistant-guided backup and restoration of data
- Compatible with Windows 7, 8.x, and 10, and Windows Server 2008 R2, 2013, 2016, and 2019
- Support for local backups, backups to USB stick and hard disk / SSD, as well as on target directories available on the network, such as NAS or servers
- Manual selection of the target directories
- Automatic selection of directories and file types to be backed up
- Support of Windows libraries for automatic backup
- Full and automatic backup of all selected files
- Automatic detection of new and changed files to add to existing backups (a so-called "incremental" backup)
- Definition of file filters for backup (e.g. photos, videos, music, office documents)
- Automatically create an intelligent directory structure so that backups to a destination

medium can be made by multiple users on multiple PCs

- Detailed logging of the backup and restore
- Definition of exclusion lists, for example to exclude system directories and files during backup
- Provision for Microsoft OneDrive directories
- Option to define minimum and maximum file size for the backup
- Integrated scheduling for automatic backups at defined times
- Automatic detection and adjustment of the target drive when used on different systems

Pricing and availability

O&O FileBackup costs 29.95 USD. There's also a license that can be used on up to 5 computers available for 39.95 USD. All prices include 19% VAT wherever applicable.

Interested users can find a free, 30-day trial version of O&O FileBackup on the O&O Website:

<https://www.oo-software.com/oofilebackup/>

The test version allows users to create and restore images/backups from their own computers for a period of up to 30 days. In this way, they can see for themselves the full extent of the product's features and performance. Details about O&O Authorized Partners can be found at <https://www.oo-software.com/en/order/reseller/>.
